

Big-Oh Notation

$f(n) = O(g(n))$ iff. there exist positive constants c and n_0 such that $f(n) \leq c \cdot g(n)$ for all $n \geq n_0$.

Rules of Big-Oh Notation

使用最小的 $g(n)$

對於多項式來說：

1. Drop lower-order terms
2. Drop constant factors

$$1 < \log n < n < n \log n < n^2 < n^3 < a^n$$
